

UNDERBODY DRAWER

The **Underbody Drawer** is designed to fit seamlessly with all Triple M QuickLock Aluminium and Steel Bodies. The drawer is constructed using heavy duty galvanized steel and is capable of carrying loads up to 100kg.

The **Underbody Drawer** is available in 3 sizes, and features an innovative incremental locking system, enabling the user to secure the drawer in an open position.

FEATURES

- Mounts directly to the main bearers of the traybody which reduces fitment time.
- Fully enclosed box with rubber seal to provide water and dust resistance.
- Stylish HDP Fascia with number plate mounting and integrated locking.
- 4 stage incremental locking system.
- Internal divider system.
- Low profile traybody mount kit to reduce the effect on deck height increase from the drawer.
- Heavy duty roller system running on a rigid bearing rail for maximum strength when fully extended.
